

## METAL UNION IS EXCITED TO ANNOUNCE THE LAUNCH OF A BRAND NEW, AMERICAN DESIGNED AND MANUFACTURED MINI JET BOAT!

These boats will come in sizes ranging from 11' to 15' and will accept the powertrain from any donor jet ski. **Jet boats can be purchased as a flat kit for you to assemble yourself, a welded hull ready to accept your donor powertrain, or as a turnkey boat ready for fun.**

Currently, we are engineering complete assembly systems for powertrain mounting, steering, wiring, and seating for the next generation of Metal Union mini jet boats. In the near future we will be able to offer all the pieces necessary to build your own mini jet boat, all in one place.

Our hulls are cut out of .1875" and .125" marine grade aluminum 5052 making them the perfect balance between strength and light weight.

**Bare hull price: \$2750-\$2950**

**Welded price: \$5750-\$5950**
